About

I'm a Full-Stack Developer with a journey that began with hacking. Back in school, Kali Linux was my playground for exploring network protocols and system vulnerabilities to understand how systems work and sometimes how they broke. I moved from native Android to cross-platform React Native and eventually into MERN stack and backend architecture. Currently working remotely for a New York based startup and open to full-time opportunities where I can build products and continue learning based on business and team priorities.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, XML, HTML5, CSS
Frontend: React, SolidJS, Next.js, Three.js, GSAP, Redux, Tailwind CSS, Material UI
Backend: Node.js, Express.js, REST APIs, JWT Auth, Middleware, API Rate Limiting
Databases: MongoDB, PostgreSQL, tbDatabase, ScylerDB, SQL
Mobile: Android, React Native
DevOps & Cloud: AWS, GCP, Firebase, Docker, GitHub Actions, Nginx, PM2
Other Tools: VS Code, Postman, Android Studio, Jira, Figma, Git, Webpack, Storybook

Core Computer Science Competencies

- Data Structures & Algorithms
- Operating Systems Concepts
- Database Design & Optimization
- Distributed Systems
- API Design & System Architecture
- Network & Web Protocols
- Microservices & DevOps
- Authentication & Security
- Cloud Infrastructure

Experience

ConnectAide, New York (Remote)

Sep. 2024 – Present

Full-Stack Developer

Remote

- Built modular Node.js / Express microservices handling authentication (JWT/OAuth2), rate-limiting, and multi-environment API deployment.
- Designed and optimized schemas across MongoDB, PostgreSQL, tbDatabase and ScylerDB; improved query performance via indexing, caching and aggregation tuning.
- Integrated AWS services (Lambda, S3, CloudFront, Amplify) to enable CI/CD, storage, and serverless automation.
- Developed reusable React and SolidJS components, leveraging Three.js and GSAP for animations, 3D visualizations, and dynamic user experiences.

Projects

Consulting Website + CMS Admin | *Next.js, TypeScript, Tailwind, Node.js*

- Built a high-performance consulting company site with modular CMS, SEO optimization and secure API backend.
- **GitHub:** Consulting-influidity **Live:** avvjit-consulting.netlify.app **In Production:** influidity.com

LeadSeeder SaaS Platform | *Next.js, TypeScript, Auth, Dashboard, Payments*

- Developed scalable SaaS infrastructure with secure authentication and business analytics.
- **GitHub:** seed **In Production:** leadseeder.co

Private Capital Investment Admin Panel | *Node.js, React, PostgreSQL*

- Built a complex finance administration system with access control, dashboards, and data automation.
- **GitHub:** castle **In Production:** dnhfintech.com

Additional Projects | *Multi-stack Development*

- Shopkeeper POS App — GitHub: Pos (Flutter Dart)
- Education Chat App — GitHub: Cllasify (Java, XML)
- Internal everyday tools utilities — GitHub: Volume and many more...

Education

State University

Bachelor of Computer Application

Sep. 2019 – Dropped on 1st SEM

Kalyani, West bangal
